MARKING GUIDELINES

MARKS: 80

These marking guidelines consist of 11 pages.

INSTRUCTIONS TO MARKERS

1. Candidates are required to answer ALL the questions.
2. This marking guideline serves as a guide to markers. Some responses may require a marker's discretion, while others may be expanded at the national marking guideline discussion.
3. Candidates' responses should be assessed as objectively as possible.

MARKING THE COMPREHENSION

- Because the focus is on understanding, incorrect spelling and language errors in responses should not be penalised unless such errors change the meaning/understanding. (Errors must still be indicated.)
- If a candidate uses words from a language other than the one being examined, disregard those words, and if the answer still makes sense, do not penalise. However, if a word from another language is used in a text and required in an answer, this will be acceptable.
- For **open-ended questions**, no marks should be awarded for YES/NO or I AGREE/I DISAGREE. The reason/substantiation/motivation is what should be considered.
- When one-word answers are required and the candidate gives a whole sentence, mark correct **provided that** the correct word is underlined/highlighted.
- When two/three facts/points are required and a range is given, mark **only** the first two/three.
- Accept dialectal variations.
- For multiple-choice questions, accept BOTH the letter corresponding with the correct answer AND/OR the answer written out in full.

Yes.

Electric vehicles are not common in South Africa. To encourage people to buy electric vehicles, the South African government will have to find ways to motivate buyers and also make these vehicles more affordable.

OR

No.

People should take action on their own to contribute towards saving the environment. Offering people incentives does not necessarily guarantee that they will be interested in buying electric vehicles.

NOTE: Accept other suitable answers. A candidate can score 1 mark for an answer that is not well-substantiated. Accept a combination answer. (2)

1.10 Open-ended. Accept a suitable answer, e.g.

The title is suitable because it is linked to the article which is about electric vehicles and how they contribute to saving the environment. 'Gear up' means 'get ready'. The writer is saying we should be ready/prepared for more electric vehicles on the roads. The title also uses a pun as vehicles use gears to increase their speed.

OR

The title is not suitable because the article discusses the idea that electric vehicles are not popular and people need more motivation to purchase them. Electric cars are also depicted as being scarce and expensive in South Africa.

NOTE: Accept other suitable answers. A candidate can score 1 mark for an answer that is not well-substantiated. Accept a combination answer. (2)

The words will be easier to understand because not all people are able to interpret visual texts.

NOTE: Accept other suitable answers. A candidate can score 1 mark for an answer that is not well-substantiated. Accept a combination answer. (2)
